

## **TARVAMÄE FARM**

- **Owner of the farm is Ego Siig.**
- **After graduation in 1992 Ego and his brother decided to start farming and began to cultivate 7 ha of land. That's the starting point for Tarvamäe Farm.**
- **Tarvamäe Farm is specialized in arable and energy crop production. Nowadays, also businesses in forestry, fishery and in machinery form a significant part of farm's income.**
- **The total area of the farm is 488 ha (in 2008) and only arable crops (rape, pea, winter wheat, barley, oat with under-sown clover) are grown.**
- **Energy crops (oil-seed rape) are grown on 103 ha of land.**
- **Soils with high organic matter content (peat soils - Histosols by WRB) cover 15% of his agricultural land. Peat soils are rarely used for arable crops in Europe.**
- **Subsidies in 2008: single area payment support, AE support (environmentally friendly production scheme), less-favoured area support, support for growing energy crops and other non-area based supports.**

- pea
- oat
- barley
- barely - clover undersow
- rape
- clover
- rye
- winter wheat
